STATEMENT OF RELEVANCY

Reference AO (2003-513349) of Form PTO-1449:

This discloses a proxy sever which has a similar purpose. But the verification of scripts is done by executing scripts on an interpreter in a simulated environment, and the execution time of the verification does not have an upper bound.

Reference AP (2003-504723) of Form PTO-1449:

This discloses a proxy server which has a similar purpose. But behavior of scripts is not verified.

Reference AU of Form PTO-1449:

This reference describes a product which implements above two patent applications.

Reference AV of Form PTO-1449:

This paper relates a proxy server which has similar purpose. But verification is done not on responses from servers, but on requests from clients, and administrators need to create a policy description on every web pages.

Reference AW of Form PTO-1449:

This describes a method of mitigating cross-site scripting with cookies which has a special attribute that specifies a cookie is not accessible through scripts. But that method needs a specific Web browser, and cannot completely eliminate the danger of cross-site scripting.

Reference AX of Form PTO-1449:

This press release describes that "Norton Personal Firewall 2002" has a new personal data protection feature which prevents Web browsers from sending data in cookies against the will of the user. But that feature does not take account of the policy of Web sites.

Reference AY of Form PTO-1449:

This includes an explanation of cross-site scripting vulnerability, a statistic investigation of the vulnerability on production systems, and a proposal of site construction method mitigating the vulnerability. But that proposal even does not try to detect specific attacks.

Reference AZ of Form PTO-1449:

Section 1 - 2 of this textbook describes programming techniques that are needed for writing web applications which does not have cross-site scripting vulnerability. But those techniques cannot be applicable to Web sites which do not have source codes of Web applications.
